Re: Compostability Certificates

Dear Mr Salada,

With this letter Avery Dennison confirms certification of compostability for the facestock and adhesive used in these products:

- BL455, THERMAL ECO BPA FREE FSC S9500-BG40WH FSC
- AM424, TRANSFER VELLUM FSC S9500-BG40WH FSC
- AM581, NATUREFLEX WHITE S9500-BG40WH FSC
- AO293, NATUREFLEX CLEAR S9500-BG40WH FSC
- AV816, PLA CLEAR S9500-BG40WH FSC

For these five products the EN13432 certification for the face is held by our supplier, and for the S9500 the EN13432 certification is held by Avery Dennison. There is no certification of the laminated product. All other products available with S9500 only have EN13432 certification for the adhesive.

Your sales representative and our customer service are available in case of further questions.

Sincerely,

Luuk Zonneveld

A handwritten signature in black ink, appearing to read 'Luuk Zonneveld', with a small dot at the end.
